

zenan[®]
GLASS

Bringing the best in the world of glassware

2026

Embark on an exciting, educational and profitable journey with us; a journey of

Flavour Discovery™

Centuries old, beer is enjoying a resurgence in popularity today. Its perception is evolving and redefining itself. Beer lovers are rediscovering beer and all it has to offer. Beer lovers are realizing that beer is as complex, delightful, aromatic and sensual as wine.

zenan™, is leading a wave of change unlike any you have ever experienced before!

We are turning beer on its head! Redefining how you view your beer and how your beer is appreciated by your customers.

We will MAXIMIZE your beer experience with the ideal glass for your unique product.

Are all beers created equally? Are you placing your own unique stamp on your beer?

Why choose a generic pilsner or lager glass, when you can choose the perfect one that brings out the very best in your beer?

Awaken your customers' senses and taste buds by choosing a glass that accentuates the characteristics created by your Brewmaster.

By selecting the ideal shape, you will appreciate the refreshing coriander and citrus of a wheat beer, or the warm hints of cinnamon and spice in a winter ale.

Join us on our flavour discovery.

EASY DRINKING

Often pale to golden in colour. Light in alcohol (5% ABV or below). Very little malt presence. Very little hop presence. Aromatics included fruit and floral. Serving temperature should be 2-5°C.

REFRESHING

Colour ranges from pale to dark amber. Styles include wheat beers (Belgian and German). Generally higher carbonation and therefore more thirst quenching. Serving temperature should be 2-5°C.

THIRST QUENCHING

Colour range from light golden to dark golden/amber. Aromatics are more pronounced with both malt or hops coming through. Flavours are more pronounced. Higher levels of bitterness but still moderate. IBUs range from 12-21. Serving temperature should be 2-5°C.

SMOOTH

Colour ranges from golden to black. Aromatics are now substantial. Much higher levels of bitterness. IBUs range from 20-38. Serving temperature should be 4-7°C.

FULL BODIED

Colour ranges from golden to dark brown. Higher levels of malt and lower presence of hops. Typically some mouth coating characteristics. IBUs range from 20-40. Serving temperature should be 4-10°C. Could also include spiced beers, honey and barrel aged.

ROBUST

Colour ranges from dark brown to black. Roasted flavours, chocolate and coffee are dominant. Hop aromatics are not present. Hop bitterness is present but restrained. IBUs range from 40-60. Serving temperature should be 7-12°C.

BOLD

Colour ranges from golden to dark amber. Hop aromatics are bold, malt is more subdued. Alcohol levels are higher 5.6%+. IBUs range from 35-80. Serving temperature should be 5-14°C.

COMPLEX

Colour ranges from golden to black. Hop aromatics are not present. Malt aromatics and flavours are very diverse. Yeast aromatics are also dominant. IBUs range from 17-35. Serving temperature should be 7-17°C. Alcohol presence is notable but not harsh.

FRUITY

Colour ranges from golden to red. Hop aromatics are not present. Malt aromatics are subtle, if present. Fruity aromatics are dominant. Flavours and aromatics could also include tart or sour. IBUs are low. Serving temperature should be 2-7°C.

zenan™

Green Technology

We are proud to be the leading Canadian manufacturer offering UV glassware printing technology.

UV TECHNOLOGY FROM ZENAN:

- TOTALLY GREEN
 - OFFERS STABILITY AND LONGER GLASS LIFESPAN
 - RETAINS ALL THE TOUGHENING IN THE GLASS
 - HIGHLY EFFECTIVE AND RELIABLE PRINTING PROCESS
 - MOST COST EFFECTIVE
 - MAINTAINS GLASS STRENGTH
 - STANDS UP TO THE RIGOROUS FOODSERVICE ENVIRONMENT
 - WITHSTANDS HARSH INDUSTRIAL DISHWASHERS
 - OFFERS THE WIDEST COLOUR PALETTE, INCLUDING PINKS AND PURPLES NEVER SEEN BEFORE.
-
- Zenan is the leading Canadian manufacturer offering UV Glassware Printing Technology.
 - Zenan is the leading Canadian manufacturer offering decorated tempered and toughened glass.
 - Zenan's unique Glassware Pre-Treatment Process ensures dishwasher durability and bright lustrous colours for more than 800 cycles.

DIGITAL TECHNOLOGY

- 4 COLOUR PROCESS PRINTING TECHNOLOGY
- YOUR BRAND AS YOU IMAGINED IT
- COMPLETELY GREEN

zenan™ Branding Techniques

Decals are utilized for tight registration or multiple color designs. Decals are generally hand Applied to the product. Decals often allow for a larger decorating area on many items. Decals offer the advantages of increased resolution, product application flexibility and tighter registration. There is no difference in the final lasting permanence of a decal and between the direct screen process.

DECALS

Deep Etching requires skill and individual craftsmanship from our artisan. This high perceived valued process is a permanent technique of the artisan who sand blasts your design with fine detail into the glass vessel.

DEEP ETCHING

An economical option to Deep Etching. Ideal for personalization & monogramming. Create an elegant impression with our laser etching.

LASER ETCHING

Direct Screen Imprints are printed directly onto the product or item. This is generally the most economical imprint method.

DIRECT

ONE OR MULTIPLE COLOUR

4 Colour Process involves making computer separations from a customer's original full colour artwork, breaking down its full range of multiple colours and tones into four basic colours. Four colour process decals have the same lasting permanence as a direct screened imprint.

4 COLOUR PROCESS

Metallic Gold or Platinum Halo enhancements are available upon request for most glass and ceramic items.

GOLD HALOS

Nucleation is the process of having your design laser etched into the bottom of your glass for a unique branding process. Laser etching creates more effervescence, or "bubble, within your beverage by circulating the air in the glass. This allows your beverages to stay fresher longer.

NUCLEATION

Almost any glassware can be Color Sprayed with colours that are durable in the dishwasher. This technique enhances the value and beauty of the glassware.

ORGANIC COLOUR SPRAYS

Reverse Printing on glassware enables the reader to view the message or logo while looking through the Glassware.

REVERSE IMPRINTING

Satin Etch is a very popular imprint choice. Satin Etch has an elegant look and feel. Satin Etch is less costly than actual deep etching, you may reproduce fine details and it is priced as a one-colour imprint.

SATIN ETCH

Bring you brand to life with digital printing. The possibilities are endless with full wrap, full CMYK capability using organic water based inks. This process is ideal for retail and gift with purchase items that will definitely get your customers talking about your brand.

DIGITAL PRINT

No other glassware decorator, provides as wide a range of decorating techniques as Zenan does. If you don't see the process you are looking for, please contact us. We will try to develop a solution for your printing needs.

Unleash your imagination with Zenan!

Zenan offers a wide range of design options from conceiving new ideas and creatively reinvent current designs. Including producing sketched concepts, design presentations, computer aided 3D models and physical prototypes. A comprehensive analysis of the combining clients needs and wants with an in-depth understanding of the product and production process to advance your brand.

“Sometimes you know exactly what you’re looking for and sometimes you don’t know what you want until you see it. Our job is to determine and create the best technically possible design in either situation.”

Create your own custom glass as easily as 1-2-3 with our in house team of professionals. Our on site staff industrial designer, graphic designers and marketing team will assist in the development of your perfect glass. Using the principles of our trademarked flavour discovery, we will ensure your new glass will showcase the very best in your beer and enhance the flavours and aromas that makes your beer unique!

Low minimums!

Storage with Zenan at our facility!

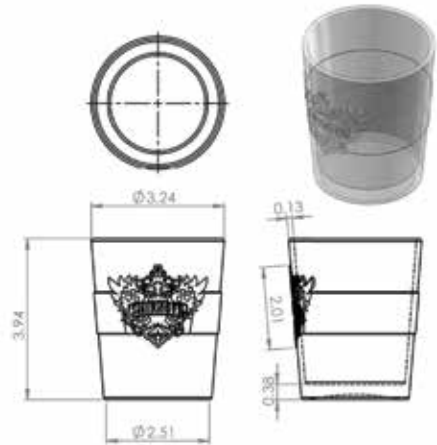

Free designs and preproduction samples!

Same great pricing and client care Zenan is famous for!

Step 1: Sketches.

Step 2: Technical Drawings.

Step 3: Concept Presentations.

Step 4: Enjoy the beauty of your glass.

GROWLERS

UV TOUGH. UV DURABLE. UV GREEN.

"Zenan is the ONLY manufacturer in Canada offering UV printing technology."

The traditional method of printing thermally stresses glassware in 90% of the cases, limiting the durability & longevity of the product. Zenan is the only company in Canada that uses UV based organic inks and technology, which guarantees toughened glass whether it is heat treated or made out of titanium oxide.
