zenan[®]
GLASS
Bringing the Best in the World of Glassware

zenan™ Branding Techniques

Decals are utilized for tight registration or multiple color designs. Decals are generally hand Applied to the product. Decals often allow for a larger decorating area on many items. Decals offer the advantages of increased resolution, product application flexibility and tighter registration. There is no difference in the final lasting permanence of a decal and between the direct screen process.

DECALS

Deep Etching requires skill and individual craftsmanship from our artisan. This high perceived valued process is a permanent technique of the artisan who sand blasts your design with fine detail into the glass vessel.

DEEP ETCHING

An economical option to Deep Etching. Ideal for personalization & monogramming. Create an elegant impression with our laser etching.

LASER ETCHING

Direct Screen Imprints are printed directly onto the product or item. This is generally the most economical imprint method.

DIRECT

ONE OR MULTIPLE COLOUR

4 Colour Process involves making computer separations from a customer's original full colour artwork, breaking down its full range of multiple colours and tones into four basic colours. Four colour process decals have the same lasting permanence as a direct screened imprint.

4 COLOUR PROCESS

Metallic Gold or Platinum Halo enhancements are available upon request for most glass and ceramic items.

GOLD HALOS

Nucleation is the process of having your design laser etched into the bottom of your glass for a unique branding process. Laser etching creates more effervescence, or "bubble, within your beverage by circulating the air in the glass. This allows your beverages to stay fresher longer.

NUCLEATION

Almost any glassware can be Color Sprayed with colours that are durable in the dishwasher. This technique enhances the value and beauty of the glassware.

ORGANIC COLOUR SPRAYS

Reverse Printing on glassware enables the reader to view the message or logo while looking through the Glassware.

REVERSE IMPRINTING

Satin Etch is a very popular imprint choice. Satin Etch has an elegant look and feel. Satin Etch is less costly than actual deep etching, you may reproduce fine details and it is priced as a one-colour imprint.

SATIN ETCH

Bring you brand to life with digital printing. The possibilities are endless with full wrap, full CMYK capability using organic water based inks. This process is ideal for retail and gift with purchase items that will definitely get your customers talking about your brand.

DIGITAL PRINT

No other glassware decorator, provides as wide a range of decorating techniques as Zenan does. If you don't see the process you are looking for, please contact us. We will try to develop a solution for your printing needs.

RCR Cristalleria Italiana features a design of deep cuts that carve into the glass with the physical power of a sculptor's hand. Liqueurs and cocktails are showcased.
